

Fentanyl-laced pills and powders are at an all-time high

SAVE A FRIEND'S LIFE BY CARRYING NALOXONE

YOU CAN REVERSE AN OVERDOSE IN 4 EASY STEPS:

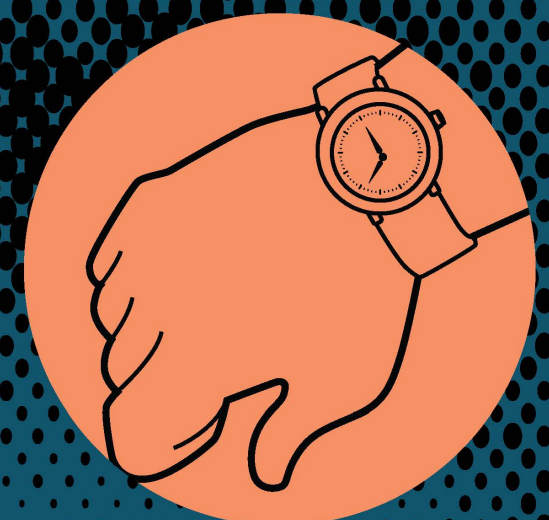

1 CALL 911

2 PLACE in their nose

3 PRESS down to release

4 WAIT for 2 minutes

Repeat once if needed in alternate nostril

The goal of administering naloxone is to restore breathing, not consciousness, and usually no more than 1-4 doses are needed.
