SAPP SUB-GRANTS

Definitions

**Sub-Grant A – Local Capacity Building**
This grant is designed for providers with little or no experience in delivering substance abuse prevention services. Funds will support assessment and limited delivery of ‘universal’ and ‘selected’ services for youth ages 11-18 and their families, schools and/or communities. The purpose of this grant is to broaden the network of communities receiving substance abuse prevention services and thereby assist local providers in building the organizational and community capacity.

**Sub-Grant B – Direct Service**
The Direct Service grant is designed to support evidence-based substance abuse prevention direct services that target individuals and families. Applicants must deliver services using one or more of the following four (4) core Direct Service approaches:

1. Youth Prevention Education
2. Parent/Family Education
3. Mentoring
4. Communication Campaigns

Grantees may elect to conduct mobilization activities to **create a new** substance abuse prevention coalition or to **enhance an existing** substance abuse prevention coalition in the community. Grantees approved for creating a new coalition must develop a multi-sector coalition. The coalition must agree to meet on at least a quarterly basis, develop a mission statement that includes the reduction of youth substance use, and develop coalition capacity (clear roles and organizational structure, meeting and communication habits, decision-making and problem-solving process, leadership).

Grantees who have been approved to enhance an existing coalition must develop a subcommittee with multi-sector representation and/or assess existing coalition’s representation and identify and recruit missing sectors. The coalition/sub-committee must agree to meet on at least a quarterly basis, review and adapt the mission statement so that it includes the reduction of youth substance use, develop a plan for gaining schools’ buy-in to administer the Illinois Youth Survey, assess current coalition capacity (clear roles and organizational structure, meeting and communication habits, decision-making and problem-solving process, leadership) and determine areas that need to be enhanced/strengthened and develop a plan to address the gaps that were identified.
**Sub-Grant C – Strategic Prevention Framework (SPF)**

This grant is designed to support the use of the Strategic Prevention Framework (SPF). The Strategic Prevention Framework (SPF) was developed by the Substance Abuse and Mental Health Services Administration (SAMHSA). SPF is a structured planning process that can be applied to prevention systems at both the state and local level. This process is an effective way for coalitions to address substance abuse issues within the community.

SPF is intended to provide a structure or mechanism for coalitions and other broadly represented community organizations to identify the most pressing substance abuse problems in their community. SPF uses a data-driven approach to understand what the most pressing problems are, who is affected most by the problems (consumption and consequences), why the problems are happening (contributing factors or intervening variables), and what programs, practices, and policies are most effective in addressing these problems and contributing factors. The guiding principle of this framework is that data on problems, resources and readiness should guide the selection of evidence-based prevention strategies. Each community could potentially have a different set of outcomes targeted, but the goal is always community-level change in substance use consumption patterns and consequences.

The Strategic Prevention is a five-step process that includes Assessment, Capacity Building, Planning, Implementation, and Evaluation. Within each step, there is a focus on both cultural competence and sustainability:
**Assessment:** identify local youth substance use problems and the community conditions that contribute to the specific drug use issues identified.

*Capacity Building:* mobilize/build capacity to change the conditions and address the youth substance abuse problems.

*Planning:* developing a logic model and comprehensive action plan.

*Implementation:* implement the plan with evidence-based strategies.

*Evaluation:* monitor, sustain, improve and replace prevention strategies.

This grant will support universal and selected services serving youth ages 11-20 and their families, school or community.

**Sub-Grant D – State Capacity Building**

This grant is designed to target unique audiences throughout the state of Illinois or the greater Chicago area: chambers of commerce/business, physicians, institutions of higher education, judicial/States Attorneys, senior citizens, immigrants and youth leadership (in using data driven decision making). The applicants would be responsible for delivery of services that develops capacity of the sector and engages the respective sector at the local level to address substance abuse prevention. This grant will support ‘universal’ and ‘selected’ prevention services serving a unique population. For the State Capacity Building Grant, the geographic boundary must be the state of Illinois or the city of Chicago and surrounding area.

---

6 ‘Universal’ prevention strategies address the entire population with messages aimed at preventing alcohol and/or substance abuse; ‘selected’ strategies target subsets that are deemed to be at risk for abuse.
