

Preventing teen suicide so teens have the opportunity to live to their full potential

A comprehensive school-based suicide prevention approach

Illinois Youth Suicide Prevention Project

Jennifer L. Martin, M.S.W.

Injury Prevention Coordinator

Injury and Violence Prevention Program

Illinois Department of Public Health

Today's Presentation

We want a society where people can live to their full potential; however, the reality is that a variety of circumstances can lead a person to feel helpless, even attempt to take one's life.

1-800-273-TALK (8255)
suicidepreventionlifeline.org

This training is made available by the Illinois Department of Public Health through funding from grant number 1U79SM060429-01 awarded by the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS). The views, policies, and opinions expressed are those of the authors and do not necessarily reflect those of SAMHSA or HHS.

Suicide is a public health problem.

- Complex problem associated with multiple factors:
 - Individual (biological, psychological)
 - Environmental (physical, interpersonal, community, societal)
- Requires a community-wide effort, across disciplines

Today's Presentation

- The reality of youth suicide
- Risk factors and warning signs
- What can school personnel do to prevent suicide
- Illinois Youth Suicide Prevention Project (e.g., Statewide “Gatekeeper” Training for Educators)
- Resources
- Q&A

THE REALITY OF YOUTH SUICIDE

The reality of youth suicide

Fact Finding and Sharing - Quiz

Suicide is the _____ leading cause of death for adolescents and young adults in Illinois.

- a) 8th
- b) 2nd
- c) 1st
- d) 3rd

In Illinois, approximately _____ young lives ages 10-24 are lost per year to suicide.

- a) 403
- b) 200
- c) 125
- d) 80

The number of youth who attempt suicide annually in Illinois is _____.

- a) 300
- b) 700
- c) 1500
- d) 3000

A person who attempts suicide is at greater risk for repeat attempts with increasing lethality.

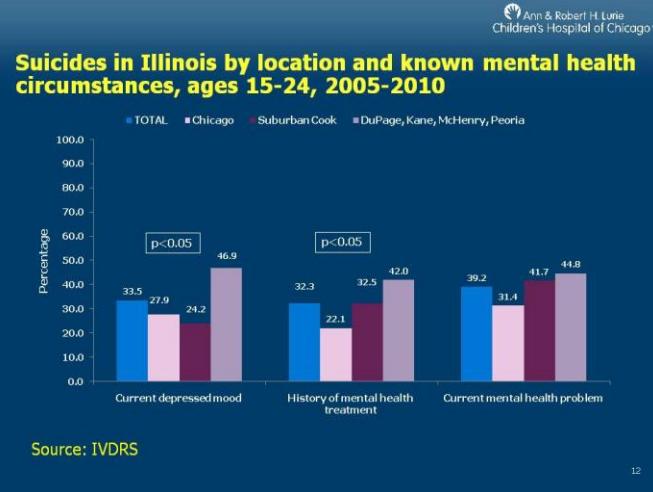

- a) True
- b) False

The reality of youth suicide

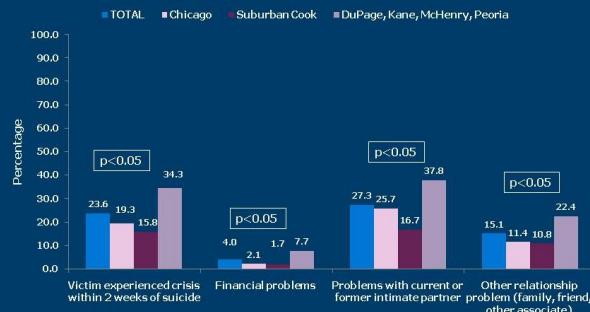

Illinois Data

Youth – ages 10 to 24

- Suicide
 - Suicide is the third leading cause of death
 - Approximately 125 young lives lost each year in Illinois
- Suicide attempt
 - Approximately 3,000 youth receive medical care for self-inflicted injuries at Emergency Departments in Illinois
 - In an average classroom of 30 high school students, two students will have attempted suicide in past 12 months
- Suicide Ideation
 - Bases on a 2011 Illinois survey of youth in grades 9-12 – “in the 12 months preceding the survey”
 - 14.3 percent of students reported seriously considering suicide
 - 13.1 percent reported creating a plan
 - 8 percent reporting trying to take their own life
 - 2.6 percent received medical care following the attempt

The reality of youth suicide

At-Risk Population – LGB Youth

Depressive Feelings and Suicide-Related Questions of High School Students by Sexual Orientation, 2009

- In 2009, Illinois YRBS data found when lesbian, gay and bisexual youth are compared to their non-gay peers they are more than three times more likely to report considering suicide in the past 12 months and to have made a suicide plan in the past 12 months. Additionally, they were almost five times more likely to have attempted suicide in the past 12 months.

RISK FACTORS

Risk Factors

Several factors can put a young person at risk for suicide. However, having these risk factors does not always mean that suicide will occur.

The most significant ones are:

- Prior suicide attempt(s)
- Substance abuse
- Mood disorders
- Access to lethal means

Risk Factors

Other risk factors include the following circumstances and problems:

- Recent death of a friend, especially if by suicide
- Recent death of or separation from a family member
- Engaging in self-harm
- Problems in school (academic and/or discipline)
- Relationship problems or breakups
- Bullying or other forms of violence
- Discrimination based on sexual orientation or gender nonconformity
- Family problems or abuse, current or in the past
- Legal issues
- Serious illness or injury
- Other stressful events

WARNING SIGNS

Warning signs and corresponding action steps

Call 9-1-1 or seek immediate help from a mental health provider when you hear or see any one of these behaviors:

- Someone threatening to hurt or kill themselves
- Someone looking for ways to kill themselves: seeking access to pills, weapons, or other means
- Someone talking or writing about death, dying, or suicide

Seek help by contacting a mental health professional or calling 1-800-273-TALK for a referral should you witness, hear, or see anyone exhibiting any one or more of these behaviors:

- Hopelessness
- Rage, anger, seeking revenge
- Acting reckless or engaging in risky activities, seemingly without thinking
- Feeling trapped—like there's no way out
- Increasing alcohol or drug use
- Withdrawing from friends, family or society
- Anxiety, agitation, unable to sleep, or sleeping all the time
- Dramatic mood changes
- No reason for living; no sense of purpose in life

PROTECTIVE FACTORS

Protective Factors

Protective factors are not just the opposite or lack of risk factors. Rather, they are conditions that promote strength and resilience and ensure that vulnerable individuals are supported and connected with others during difficult times, thereby making suicidal behaviors less likely.

- Effective clinical care for mental, physical and substance use disorders
- Easy access to a variety of clinical interventions and support for helpseeking
- Restricted access to highly lethal means of suicide
- Strong connections to family and community support
- Support through ongoing medical and mental health care relationships
- Skills in problem solving, conflict resolution and nonviolent handling of disputes
- Cultural and religious beliefs that discourage suicide and support self preservation

However, positive resistance to suicide is not permanent, so programs that support and maintain protection against suicide should be ongoing.

Connectedness as a Protective Factor

The degree to which a person or group is socially close, interrelated, or shares resources with other persons or groups. Connectedness occurs within and between multiple levels of the social ecology that is between individuals, families, schools and other organizations, neighborhoods, cultural groups, and society as a whole

- Connectedness between individuals
- Connectedness of individuals and their families to community organizations
- Connectedness among community organizations and social institutions

However, positive resistance to suicide is not permanent, so programs that support and maintain protection against suicide should be ongoing.

SCHOOL'S ROLE

Why address suicide?

Four reasons why schools should address suicide

1. Maintaining a safe school environment is part of a school's overall mission.
2. Student's mental health can affect their academic performance.
3. A student suicide can significantly impact other students and the entire school community.
4. Schools have been sued for negligence (e.g., failure to notify parents, get assistance, adequately supervise)

School Code Requirement

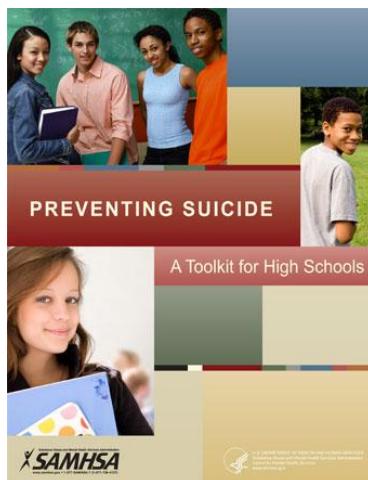

- **School code requirement**

- School guidance counselors, teachers, school social workers and other school personnel who work with students in grades 7th through 12th are required to receive training to identify the warning signs of mental illness and suicidal behavior in adolescents and teens and shall be taught appropriate intervention and referral techniques.
- Participating in or presenting at in-service training programs on suicide prevention is included in the list of possible professional development activities for teacher certification.

Your role

- **Student Assistance Programs understand**
 - The need for a comprehensive approach
 - The need for collaborative efforts among students, parents, schools and community resources
 - The benefits of empowering staff in identification and intervention for barriers to learning,
 - The benefits of creating an early identification and intervention system and of developing support systems
 - The need for connecting with community resources

Toolkit

Download at <http://store.samhsa.gov/product/SMA12-4669>

How schools can help prevent suicide.

Key components of a comprehensive school suicide prevention program:

- School wide programs that promote connectedness and emotional well-being
- Policies and procedures for helping students at risk and in crisis
- Protocols for responding to suicide death
- Postvention
- Staff education and training
- Parent/guardian education and outreach
- Student programs
 - Curricula for all students
 - Skill-building for students at risk
 - Peer leader programs
- Screening for at-risk students

How schools can help prevent suicide.

The two essential components that every school should have in place are:

- Protocols for helping students at risk of suicide
- Protocols for responding to a suicide death (and thus preventing additional suicides)

Guidance in creating these protocols can be found in Chapter 2 and 3 of the Prevention Suicide: A High School Toolkit.

How schools can help prevent suicide.

After developing the previous two critical components, all staff should be engaged in suicide prevention. This should include the following:

- Educating all staff about the importance of suicide prevention
- Training all staff to recognize suicide risk
- Training selected staff to assess and refer students at risk of suicide to appropriate services

Guidance in creating these protocols can be found in Chapter 5, 6 and 7 of the Prevention Suicide: A High School Toolkit.

How schools can help prevent suicide.

After a school has created and implemented these three components (the two essential protocols and the staff education and training outlined above), it is ready to implement additional suicide prevention strategies, including:

- Educating parents about behavioral health promotion and suicide risk
- Educating and involving students in behavioral health promotion and suicide prevention
- Screening students for suicide risk

Guidance in creating these protocols can be found in Chapter 5, 6, and 7 of the Prevention Suicide: A High School Toolkit.

STEPS FOR GETTING STARTED

Community Partners

EMTs, fire and rescue personnel, and first responders

EMT's, fire and rescue personnel, and first responders
Leaders representing the cultural communities of your students
Mental health providers/
community mental health agency staff
including emergency department staff
Substance abuse counselors
Juvenile justice professionals
Hospital staff,
County social services staff
Immigrant and refugee organization staff
LGBTQ youth-serving program staff
Media representatives
Healthcare providers
Youth development professionals
(e.g., YMCA, Boys and Girls Club, community youth center)
Police
Coroner
Community health department staff (including injury and violence
Prevention and maternal and child health professionals

How to get started.

These steps for getting started are not entirely sequential. You may want to complete them in a different order—or carry out several of them at the same time.

- Step 1: Engage administrators, school boards and other key players
 - Explain why it is important to address suicide risk among students
 - Highlight data and information specific to your district
 - Step 2: Bring people together to start the planning process
 - Engage school staff
 - Engage community partners
 - Step 3: Provide key players with basic information about youth suicide and suicide prevention
 - Step 4: Develop your overall strategy
 - Assess your current policies, programs and school culture
 - Select components of a comprehensive approach

How to get started.

Tools in the *Preventing Suicide: A High School Toolkit* to help you get started

- Suicide prevention: facts for schools
- Chart of school staff responsibilities
- Chart of community partners
- Risk and protective factors and warning signs factsheets
- Data on youth suicide
- Suicide and substance abuse information sheet
- Suicide and bullying information sheet
- The implications of culture on suicide prevention information sheet
- Checklist of suicide prevention activities
- Matrix of school-based suicide prevention programs
- Suicide prevention registries information sheet

Checklist of suicide prevention activities

Tool 1.I: Checklist of Suicide Prevention Activities

Suicide Prevention Activities	Yes	No	Not Sure	If no or not sure
Protocols for helping students at risk of suicide				
We have a written protocol for helping students who may be at risk of suicide that is consistent with guidelines in Chapter 2 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and implement steps in Chapter 2
We have a written protocol for responding to students who attempt suicide at school that is consistent with the guidelines in Chapter 2 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and implement steps in Chapter 2
We have established agreements with outside providers to provide effective and timely mental health services to our students.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and implement steps in Chapter 2
Protocols for after a suicide				
We have a written protocol for responding to the suicide of a student or other member of the school community that is consistent with the guidelines in Chapter 3 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and implement steps in Chapter 3
Staff who will implement the suicide response protocol are familiar with this protocol and the tools that will help them fulfill their responsibilities.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and implement steps in Chapter 3
We have identified community partners to help us in the event of a suicide.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and implement steps in Chapter 3
Staff education and training				
All professional and support staff have received information on the importance of school-based suicide prevention efforts, as described in Chapter 4 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and implement steps in Chapter 4
All professional and support staff have been trained to recognize and respond appropriately to students who may be at risk of suicide, as described in Chapter 4 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and consider implementing steps in Chapter 4
Our school has staff who have been trained to assess, refer, and follow up with students identified as at risk of suicide, as described in Chapter 4 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and consider implementing steps in Chapter 4
Parent/guardian education and outreach				
We educate the parents of our students about suicide and related mental health issues, as described in Chapter 5 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and consider implementing steps in Chapter 5

Suicide Prevention Activities	Yes	No	Not Sure	If no or not sure
Student education				
We have implemented at least one type of program to engage students in suicide prevention.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and consider implementing steps in Chapter 6
Suicide prevention is integrated into other student health/mental health courses and initiatives.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and consider implementing steps in Chapter 6
Screening				
We have implemented a suicide screening program, as described in Chapter 7 of this toolkit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and consider implementing steps in Chapter 7
We have the support of parents, school staff, and community mental health providers for our suicide screening program.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Review and consider implementing steps in Chapter 7

Developing protocols for helping students at risk of suicide

Steps to develop protocols to help students at risk of suicide

- Step 1: Convene a group to create protocols for helping students at risk of suicide
- Step 2: Identify the suicide risk response coordinator
- Step 3: Identify and involve mental health service providers to whom students can be referred
- Step 4: Develop a protocol to help student at risk of suicide
- Step 5: Develop a protocol for responding to a suicide attempt in the school or on the school campus
- Step 6: Plan for managing a student's return to school
- Step 7: Help staff understand the protocols

Tools found in Prevention Suicide: A High School Toolkit –

- | | |
|---|--|
| • Chart of school staff responsibilities | • Parent contact acknowledgment form |
| • Chart of community partners | • Guidelines for student referrals |
| • Questions for mental health providers | • Student suicide risk document form |

| • Guidelines for notifying parents | |

Developing protocols for responding to a suicide

Steps to develop protocols for responding to a suicide

- Step 1: Convene a group to create protocols
- Step 2: Identify community partners who can help
- Step 3: Create a protocol for your school's immediate response to a suicide
- Step 4: Include the immediate response protocol in your school's crisis response plan
- Step 5: Create a protocol for the long-term response to a suicide
- Step 6: Help staff understand the protocols
- Step 7: Update the protocols

Tools found in Prevention Suicide: A High School Toolkit –

| • Long-term response protocol | |
| • Guidelines for anniversaries of a death | |

Staff education and training

Steps to choosing and implementing suicide prevention education and training for staff

- Step 1: Convene a group to assess your staff's education and training needs
- Step 2: Provide all staff with information and awareness about suicide and the school's role in suicide prevention
- Step 3: Train staff to identify suicide risk factors and warning signs among students and to take appropriate action
- Step 4: Train selected mental health staff to assess suicide risk in individual students

Tools found in Prevention Suicide: A High School Toolkit –

- Chart of school staff responsibilities
- Suicide prevention: facts for schools
- Risk and protective factors and warning signs factsheets
- Matrix of staff education and training programs
- To live to see the great day that dawns

After a Suicide: A Toolkit for Schools

Setting: Middle & High Schools
Type of Program: Guidelines & Protocols
2001 NSSP Goal Addressed: 7.B. 8.T

Program Description

Developed by the American Foundation for Suicide Prevention (AFSP) and the Suicide Prevention Resource Center (SPRC), in collaboration with a group of related experts, including school-based personnel, clinicians, researchers, and crisis response professionals, After a Suicide: A Toolkit for Schools is an online resource for schools facing the suicide death of a student or other member of the school community. The Toolkit incorporates relevant existing material and research findings as well as references, templates, and links to additional information and assistance. It is organized into the following brief chapters:

- Introduction and Executive Summary
- Get the Facts Fast
- Crisis Response
- Tools for Crisis Response
- Helping Students Cope
- Working with the Community
- Memorialization
- Social Media
- Suicide Contagion
- Bringing in Outside Help
- Going Forward

After a Suicide: A Toolkit for Schools is intended for use in a crisis. It is not intended to be a comprehensive curriculum on school-based prevention. While designed specifically to address the aftermath of suicide, schools may find the Toolkit useful following other deaths as well.

Parent/Guardian education and outreach

Steps for developing suicide prevention education and outreach for parents

- Step 1: Convene a group to plan an implement parent education and outreach activities
- Step 2: Select or develop parent education and outreach programs
- Step 3: Identify ways to increase participation among parents at events and activities
- Step 4: Integrate parent education into existing program

Tools found in Prevention Suicide: A High School Toolkit –

- Chart of school staff responsibilities and chart of community partners
- Matrix of parent/guardian education and outreach programs
- Suicide prevention and schools: facts for parents

Student programs

Steps for developing suicide prevention education and outreach for parents

- Step 1: Convene a group to plan and implement student programs
- Step 2: Determine which type(s) of student program(s) will fit the needs of your school
- Step 3: Choose or develop the specific program(s) you want to implement at your school
- Step 4: Adapt student programs for your school community
- Step 5: Integrate suicide prevention programs into other initiatives to improve behavioral health

Tools found in Prevention Suicide: A High School Toolkit –

- Chart of school staff responsibilities
- Types of student programs information sheet
- Matrix of student programs
- To live to see the great day to dawn

Screening

Steps for developing suicide prevention education and outreach for parents

- Step 1: Convene a group to plan and conduct a screening program
- Step 2: Secure support from administrators and staff for a screening program
- Step 3: Determine which community mental health providers to use for referrals
- Step 4: Select a screening program to use for the students at your school
- Step 5: Engage parents in the screening program

Tools found in Prevention Suicide: A High School Toolkit –

- *Chart of school staff responsibilities*
- *Chart of community partners*
- *Matrix of screening program*
- *Ideas to maximize parental consent response rate*

**ILLINOIS YOUTH SUICIDE
PREVENTION PROJECT**

Illinois Youth Suicide Prevention Project

- 3-year grant-funded program – SAMHSA 1U79SM060429-01
- Targets youth ages 10-24
- Purposes of IYSPP include
 - Advancing the state suicide prevention strategic plan
 - Enhancing Primary Prevention
 - Increasing Linkage to Services
 - Increasing Protective Factors/Decrease Risk Factors for students
 - Promote National Suicide Prevention Lifeline
- Core Activities include
 - **Kognito Gatekeeper Training in Secondary/Post-Secondary Systems**
 - Expand the “It Only Takes One” website (suicide prevention campaign)
 - Promote the National Suicide Prevention Lifeline
 - Professional Development
 - Stakeholder Meetings

Role of School Personnel

- On the front lines with students every day.
- May notice worrisome behavior and appearance.
- Have existing relationships with students, and they care.
- School personnel can be the “eyes and ears” - not mental health experts, but can take small steps to a big difference.
- Goal is to **Connect with students** and then **Connect the Right students to the Right resource**: crisis team, counseling, psychologist, nurse, social worker, ally

Benefits of “Gatekeeper” Training

- A key strategy for prevention/early intervention and part of the national strategy for suicide prevention.
- Reduces the number of undetected students in schools and moves them into treatment as early as possible.
- Reduces the anxiety about responding to an at-risk student.
- Reduces stigma associated with mental illness.
- Enhances safety for individual student, school and community.

A “gatekeeper” is any individual (i.e., not necessarily a mental health professional) trained to identify individuals at risk of psychological distress and connect them to treatment or supporting services as appropriate.

Kognito At-Risk Suite for Educators

- Suite includes 9 courses:
 - 3 for middle and high school personnel
 - 6 for higher ed personnel & students
 - Special modules for LGBTQ and Veterans
- Award-winning **online** training platform
- Listed in NREPP* & SPRC/AFSP Best Practices Registry**
- Research Proven
- Broad Adoption
 - 10 State Agencies – AZ, CA, NY, OH
 - 400 Institutions of Higher Ed

* 1 listed, 1 pending

** 5 programs listed

What Makes Kognito Trainings Special?

- **Fun, engaging, effective**
- Designed especially for **education community**
- Hands on **practice**
- Private **role play** with intelligent avatars
- Individualized, real-time **feedback**
- ISBE **CE credit**
- **Easy to implement** district, or school-wide, or in higher ed

at-risk

©2012 Kognito Interactive. All Rights Reserved.

How do Kognito trainings work?

- **Assume a role**
- **Engage in virtual conversations** with At-Risk student avatars with memory and emotion that **respond like real students**
- Navigate conversations using **dialogue options**: topics (blue) and tactics (grey)
- Hear your character speak and **experience the student's response**
- **Pitfalls and best practice options** – learn from mistakes, forge new patterns based on what works

Screenshot from course: *At-Risk for Middle School*

- Links to national and local **resources**
- Print **certificate**, course **summary** and link to supplementary information

At-Risk for Middle School

Learning Objectives

1. **Recognize warning signs** that a student may be suffering from psychological stress.
2. **Initiate a conversation** with a student to build resiliency and help the student identify sources of support.
3. Upon discovering that a student experiences anxiety, depression, substance abuse or other concern, **refer the student to appropriate support**.
4. **Ask a student about possible suicidal thoughts and plans, and connect the student to the appropriate support immediately.**

Suicide Warning Signs

These signs may mean someone is at risk for suicide. Risk is greater if a behavior is new or has increased and if it seems related to a painful event, loss, or change.

- ❖ Talking about wanting to die or to kill oneself.
- ❖ Looking for a way to kill oneself, such as searching online or buying a gun.
- ❖ Talking about feeling hopeless or having no reason to live.
- ❖ Talking about feeling trapped or in unbearable pain.
- ❖ Talking about being a burden to others.
- ❖ Increasing the use of alcohol or drugs.
- ❖ Acting anxious or agitated; behaving recklessly.
- ❖ Sleeping too little or too much.
- ❖ Withdrawing or feeling isolated.
- ❖ Showing rage or talking about seeking revenge.
- ❖ Displaying extreme mood swings.

Suicide Is Preventable.
Call the Lifeline at 1-800-273-TALK (8255).

With Help Comes Hope

SPRC • Suicide Prevention Resource Center

Promoting a public health approach to suicide prevention

<http://www.sprc.org/>

The Role of High School Mental Health Providers in Preventing Suicide

- Offered Eileen to a school support group for students dealing with a lot of stress.
- Recommended she see a school counselor to determine if she needed extra help.
- Suggested she join an after-school math tutoring program to get extra help.
- Invited her to an orientation with a psychiatrist at a local community mental health center.

Over the next month, Ms. Thompson stayed in contact with Eileen to ensure that she was doing well on the outside and to assist her if she needed. She even encouraged Eileen to contact her at any time if she wanted to talk.

(From the experiences of a school psychologist)

School Mental Health Providers:

- Understood why students sometimes act out.
- Identified students who may be at risk for suicide.
- Responded to students who may be at risk for suicide.
- Recommended her to a suicide prevention resource.

The Role of High School Teachers in Preventing Suicide

The Role of High School Teachers in Preventing Suicide

Mr. Morris, a high school English teacher, had noticed that his student, Shanon, was becoming increasingly withdrawn and isolated. She had recently moved from another state and was having trouble adjusting to her new school. Mr. Morris began to pay closer attention to Shanon in English class. He noticed that she was not participating in class discussions and that she always looked sad. One day, Mr. Morris offered Shanon a friendly "You look like you're having a hard day" and asked if she wanted to talk.

After the experience of a school shooting:

Understand Why Suicide Prevention is Important

For the first time, Mr. Morris realized that he had been very unprepared for someone as the new face to give weight to that part of the school year. Mr. Morris began to pay closer attention to Shanon in English class. He noticed that she was not participating in class discussions and that she always looked sad. One day, Mr. Morris offered Shanon a friendly "You look like you're having a hard day" and asked if she wanted to talk.

Teachers:

- Identify students who may be at risk for suicide.
- Encourage students to seek help if they are having thoughts of suicide.
- Encourage students to seek help if they are having thoughts of suicide.
- Encourage students to seek help if they are having thoughts of suicide.

The Role of Teens in Preventing Suicide

If you are thinking of hurting yourself or if you are concerned that someone else may be suicidal, call the National Suicide Prevention Lifeline at 1-800-273-Talk (8255).

Allison went to Shanon in her senior English class. Shanon was a great young person who got good grades and was on the track team. She was popular with her peers, including Allison, but she did not seem to have many close friends.

One day, Allison noticed that Shanon was crying during class. Later, in the locker room, Allison asked Shanon what was wrong. Shanon told Allison that she was very unprepared for someone as the new face to give weight to that part of the school year. Allison began to pay closer attention to Shanon in English class. She noticed that Shanon was not participating in class discussions and that she always looked sad. One day, Allison offered Shanon a friendly "You look like you're having a hard day" and asked if she wanted to talk.

The following week, Allison noticed that Shanon didn't come to her track practice or to any of her other extracurricular activities. She was also not talking to anyone, including Allison, but she did not seem to have many close friends.

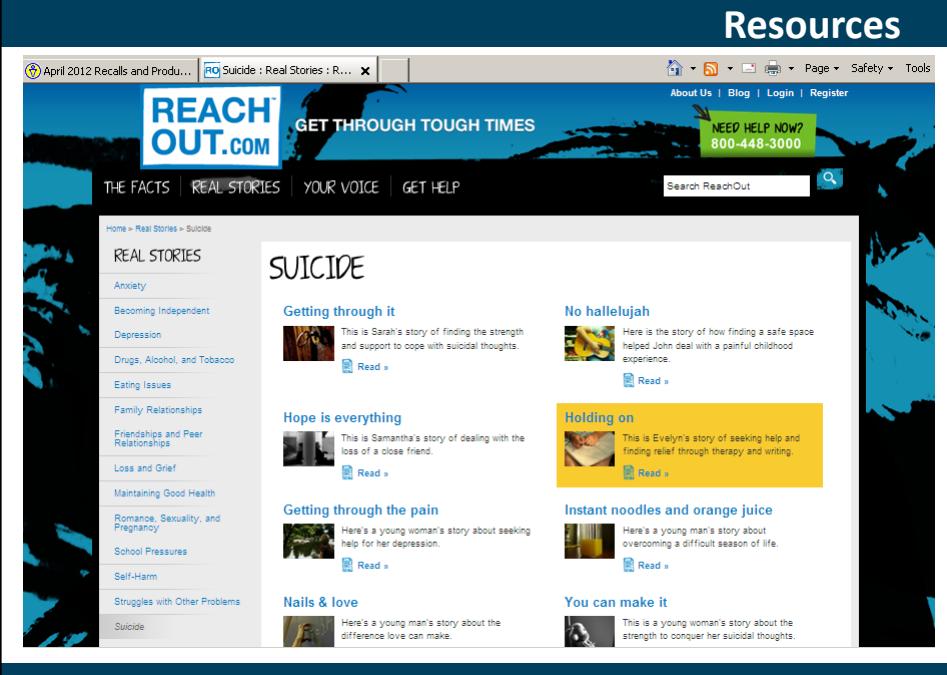

Allison was worried, but she didn't know what to do or even if it was any of her business. Allison decided to talk to Mr. Shanon, her history teacher, about the situation. Allison invited Mr. Shanon to her locker to what Allison had on say about Shanon's behavior. Mr. Shanon listened to Allison and then asked her if she would like to speak with the school counselor or the daughter of Shanon's best friend. Allison agreed. Mr. Shanon told Allison that she would be her friend now, starting with the school counselor.

The image shows a screenshot of the "It Only Takes One" campaign website. At the top right, there's a logo with two hands forming a heart shape and the text "it only takes one". To its right, a pink box contains the text "To learn more, please visit www.itonlytakesone.org". Below this, a large white area features the text "Are you the one person to help prevent a suicide? Remember... *It Only Takes One.*" in a bold, italicized font. A blue curved bar spans across the middle of the page. Underneath it, the text "For help, call the Suicide Prevention Lifeline at 800-273-Talk" is displayed. Below that, another blue section contains the text "Don't be afraid to ask about suicide. Encourage others to get help." At the bottom left, the "MHA" logo is visible, followed by the text "Mental Health America of Illinois. It Only Takes One is a suicide prevention public awareness campaign funded by the Illinois Department of Public Health and operated by Mental Health America of Illinois."
